ViewBladder 10™ Tablet Bladder Scanner

The New “Standard of Care” For Long Term Care Facilities

ViewBladder 10 is an easy-to-use tablet-based ultrasound imaging device for measuring post-void residual urine. ViewBladder 10 displays a real-time image of the bladder and allows the user to accurately measure and calculate volume of retained urine.

How is ViewBladder 10 different from other Bladder Scanners?

ViewBladder 10 is less expensive, has a lower cost of ownership, and is more accurate and reliable than competitive units.

“Very impressive, good image quality. I could see what I needed to see, and it costs less than half of what my other systems cost.” – R.J., M.D.

“Easy to use and the staff and residents love it.” – B.K., Director of Nursing

*Health Canada approved View Bladder 10 Ultrasound Probe System. P/N 99-9008
